

Gamers.bet Unity SDK QA Guide

Built for Unity SDK - V1

Prerequisites

What is needed for testing (some of these steps are listed in the QA doc):

1. Create a user account on the Gamers.bet platform: <https://club-production-8de5.up.railway.app/>
2. Fund the user's wallet.
3. Confirm access to the Sample Generator: <https://reference-server-dev-internal-testing.up.railway.app/samples/index.html>
4. Have the supplied Game Developer credentials ready for the Developer Portal: <https://developer-production.up.railway.app/>
5. Have the shared access key ready for the Sample Generator.
6. Open the Unity Client.

General Pass Criteria

1. Email Code Request

Enter the Gamers.bet user's email address and request a code. The code must arrive at that address.

2. User Authentication

Submit the code in the Unity Client. The user must authenticate successfully and be able to join a tournament or event.

3. Tournament or Event Entry

Enter a valid tournament or event ID. The Unity Client must confirm the user's entry.

4. User Portal Verification

In the User Portal:

- The transaction fee must appear on the Wallet page.
- The tournament or event must appear on the Stats page.

5. Game Developer Portal Verification

The user must appear as an entrant in the tournament or event details modal in the Game Developer Portal.

6. Leaderboard Retrieval

Show Leaderboard must return the successful response shown in this guide.

7. Sample Generator Verification

The Sample Generator must:

- Create an Opened tournament or a Started event.
- Display the tournament or event in the Game Developer Portal before any player joins.

1. Set Up a Test Account

Create a Gamers.bet account here: <https://club-production-8de5.up.railway.app/signup>

Confirm the email address, then sign in to the User Portal: <https://club-production-8de5.up.railway.app/>

Go to Wallet and click Create Wallet.

Click Deposit, enter \$50, and click Continue.

The payment modal displays different payment options. Select Debit/ Credit Card in the top left.

Click the down arrow to the right of the heading "Use a test card".

Select the card with the number 4242 4242 4242 4242

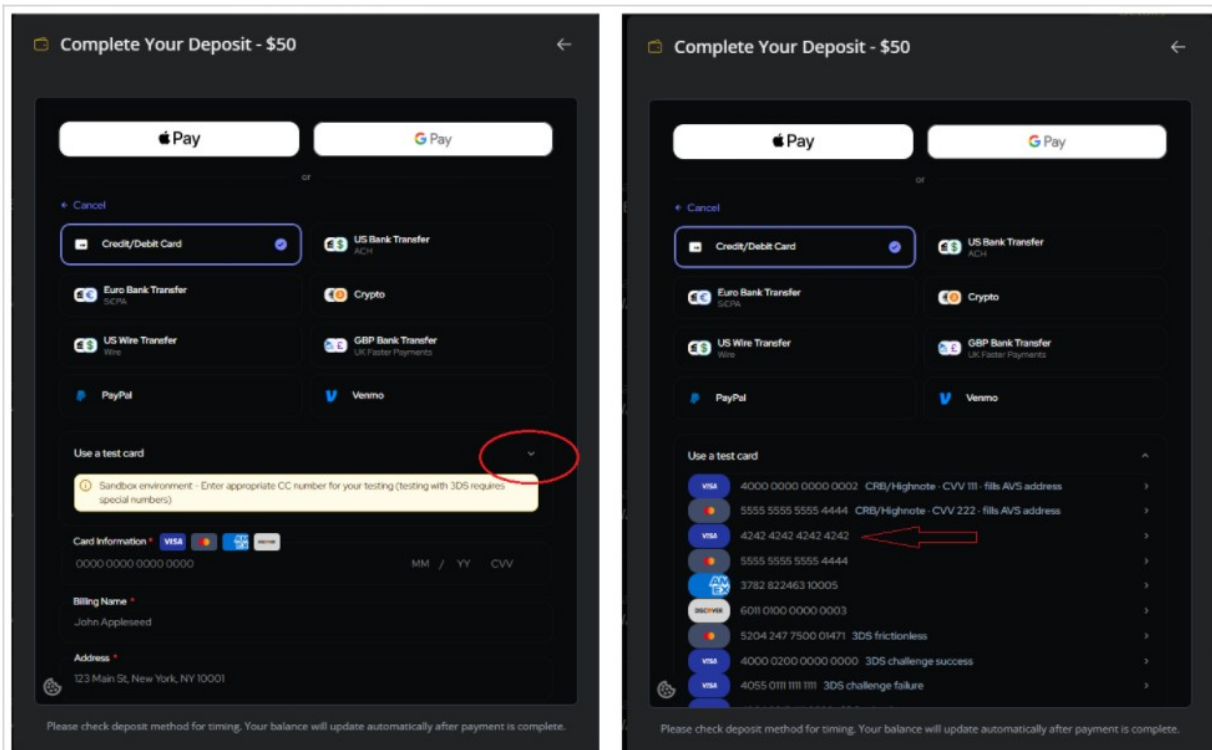

Enter a future date such as 12 / 29

In the CVV field enter 123

In the address field, start to type 123, then select any address that appears.

Click Confirm Purchase. The test account is now funded for use with the Unity SDK client.

Note: if a saved card appears immediately, enter the date 12 / 29, CVV 123.

The image shows two screenshots of a mobile application interface for completing a deposit of \$50. The left screenshot displays the initial form with fields for Card Information (Visa), Billing Name (Coinflow Tester), and Address (123). The right screenshot shows the same form with a 'Confirm Purchase of \$ 53.11' button highlighted.

2. Unity Client Fields

The Unity Client uses four fields to authenticate a user and enter a paid game mode:

Email: The email address associated with the user's Gamers.bet account.

Enter Code: The game code sent to the user's email address.

Tournament ID: The ID of the specific asynchronous paid game the user will join.

Event ID: The ID of the specific synchronous paid game the user will join.

The image shows a screenshot of the Unity Client interface. It features four input fields and their corresponding buttons:

- Enter Email** (button: Request Code)
- Enter Code** (button: Submit Code)
- Enter Tournament ID** (button: Join Tournament)
- Enter Event ID** (button: Join Event)

At the bottom of the screen, a log message is displayed:

```
[Log] [WebSocketTransport] Attempting connection to: wss://reference-server-dev-internal-testing.up.railway.app/ws/gamers
[Log] [WebSocketTransport] Connected successfully!
```

Authentication Note

In production, the email and code fields authenticate the user within the game. After authentication, the user can join multiple paid games without repeating the process, and authentication can persist between sessions.

For QA, the Unity Client demo requires email and game-code authentication at the start of each test session.

3. Successful Test Flow

Authenticate the User

Enter the test account's email address. The system sends a game code to that address, and the client state changes to AwaitingCode.

```
[Log] [ReferenceIntegration] State: RequestingAuth
[Log] [ReferenceIntegration] State: AwaitingCode
[Log] [ReferenceIntegration] Code requested for test@gamers.bet
[Log] [ReferenceIntegration] Code sent to test@gamers.bet
```

Enter the game code. The user should authenticate successfully, and the client state should change to Authenticated.

```
[Log] [ReferenceIntegration] State: AwaitingAuthResult
[Log] [ReferenceIntegration] State: Authenticated
[Log] [ReferenceIntegration] Authenticated: 91fa55a0-d8c7-48bf-ae39-
a0a1fd44fb00
[Log] [ReferenceIntegration] Signed in as 91fa55a0-d8c7-48bf-ae39-
a0a1fd44fb00
```

Join a Paid Game

The Unity Client supports two test paths. For quick testing, use the persistent QA tournament listed below as the Open Tournament ID.

Alternatively, use the Sample Generator to create a tournament or event ID for the Unity Client: <https://reference-server-dev-internal-testing.up.railway.app/samples/index.html>

Both test paths are described below.

Quick Access

Enter the Open Tournament ID below, then click Join Tournament.

Open Tournament ID: cmtdi5yuc00yktl016dbn9vs1

The user should join the selected game successfully.

```
[Log] [ReferenceIntegration] State: JoiningTournament  
[Log] [ReferenceIntegration] State: JoinedTournament  
[Log] [ReferenceIntegration] Joined tournament cmtbxhnw900v6tl01whlni7p5  
with entry cmtbxih9h00vjtl01xkpl8dw1  
[Log] [ReferenceIntegration] Entry cmtbxih9h00vjtl01xkpl8dw1 created for  
cmtbxhnw900v6tl01whlni7p5
```

The configuration associated with the ID determines the entry fee, re-entry fees, and other competition parameters. Game developers manage these settings in the Developer Portal. See Section 6.

The provided Open Tournament ID has a \$1.00 entry fee and \$1.00 re-entry fee.

Create a Tournament or Event to Join

Open the Sample Generator: <https://reference-server-dev-internal-testing.up.railway.app/samples/index.html>

Enter the supplied shared access key.

Click Connect.

Sample tournaments and events generator

Entry fee: \$0.50 for tournaments and events. Capacity: 100. First place receives 100% of the pool.

Shared access key

Enter your access key to get started.

Results

No samples created this session.

After the access key is accepted, Create and open tournament and Create and start event buttons become active.

Sample tournaments and events generator

Entry fee: \$0.50 for tournaments and events. Capacity: 100. First place receives 100% of the pool.

Shared access key

Ready. Each click creates and activates one sample.

Results

No samples created this session.

Choose the tournament or event option. Creation takes about one minute. When complete, the ID appears under Results. Click Copy ID and paste it into the corresponding Unity Client field.

Sample tournaments and events generator

Entry fee: \$0.50 for tournaments and events. Capacity: 100. First place receives 100% of the pool.

Shared access key

Sample created and activated. Copy its ID below.

Results

Tournament · OPENED

cmu6a12tu0067rz01yww254p0

Event · STARTED

cmu69ummz005zrz013v9h35n8

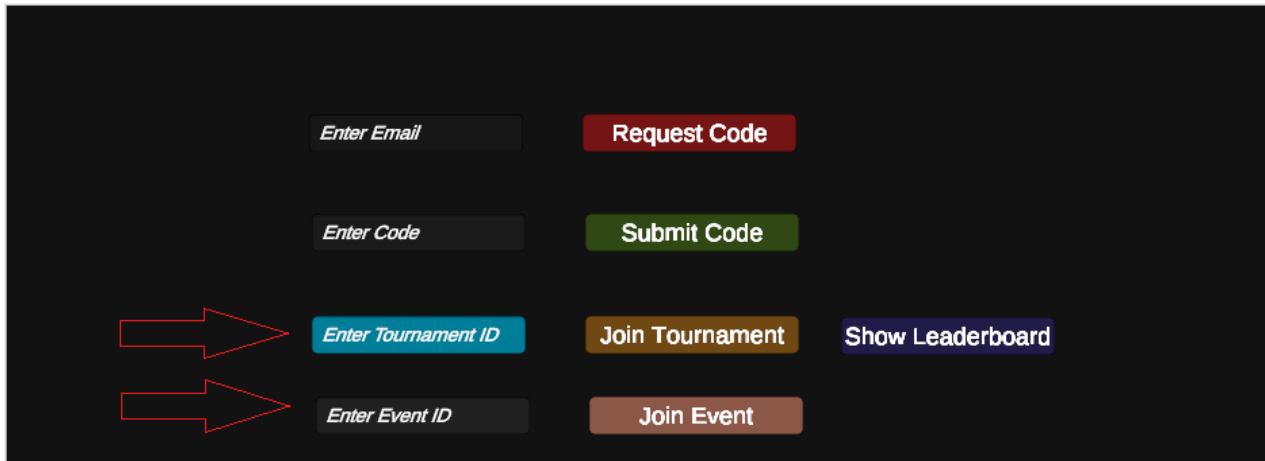

To view the new tournament or event, sign in to the Developer Portal with the supplied credentials:

<https://developer-production.up.railway.app/>

Open the Tournaments or Events tab. The newly created tournament / event should appear at the top of the table.

TOURNAMENT	GAME / MODE	ENTRY FEE	UNIQUE PARTICIPANTS	ENTRIES	STATUS
SDK sample 2026-09-17T23:43:52.123688859Z Created by the reference server sample page	 Police Trainer TournamentWinnerTakesAll	\$0.50 FIXED	0/100	0	OPENED

Enter Email Request Code

Enter Code Submit Code

Enter Tournament ID Join Tournament Show Leaderboard

Enter Event ID Join Event

This example uses a tournament. Enter the tournament ID and click Join Tournament. The Unity Client should display a success message.

```
[Log] [ReferenceIntegration] State: JoiningTournament
[Log] [ReferenceIntegration] State: JoinedTournament
[Log] [ReferenceIntegration] Joined tournament
cmu66833q0052rz01jh3qmw0a with entry cmu66ml6s005frz01h0zbschs
[Log] [ReferenceIntegration] Entry cmu66ml6s005frz01h0zbschs created for
cmu66833q0052rz01jh3qmw0a
```

Note: After State: Joined Tournament appears, click the gray box and scroll down if the rest of the success message is hidden.

To verify the tournament entry, sign in to the Developer Portal with the supplied credentials: <https://developer-production.up.railway.app/>

Open the Tournaments tab and locate the tournament. The summary should show the entry. Select the tournament, then open the Entries tab in the details modal to verify the Unity Client user.

TOURNAMENT	GAME / MODE	ENTRY FEE	UNIQUE PARTICIPANTS	ENTRIES	STATUS
SDK sample 2026-09-17T23:43:52.123688859Z Created by the reference server sample page	 Police Trainer TournamentWinnerTakesAll	\$0.50 FIXED	1/100	1	OPENED

Close						

Repeat the Process for Events

- Click Create and start event in the Sample Generator.
- Copy the event ID.
- Enter the event ID in the Unity Client and confirm the success message.
- Sign in to the Developer Portal with the supplied credentials and locate the event and its entry:
<https://developer-production.up.railway.app/>
- Select the event to view its details and verify the user who joined through the Unity Client.

Note: Tournaments and events created with the Sample Generator have a \$0.50 entry fee. Tournaments remain open for 24 hours; events remain open indefinitely. Canceling a tournament or event refunds all participants and closes it.

To verify creation, open the Tournaments or Events tab. The tournament or event created with the Sample Generator noted in Section 3 should appear in the table.

Optional: Click Cancel beside a tournament or event to refund all entrants and close it. A canceled tournament or event cannot be entered again; create a new ID with the Sample Generator.

TOURNAMENT	GAME / MODE	ENTRY FEE	UNIQUE PARTICIPANTS	ENTRIES	STATUS	START / END	CREATED	ACTIONS

4. Error Test Cases

Unassociated Email: Enter an email address that is not associated with a Gamers.bet account. The email received will contain an invitation to create a Gamers.bet account rather than a game code.

Invalid Game Code: Enter an incorrect or expired game code. Authentication will fail and the client will return INVALID_CODE.

```
[Error] [ReferenceIntegration] Error INVALID_CODE: Invalid or expired game code
[Error] [ReferenceIntegration] SubmitCode failed: INVALID_CODE - Invalid or expired game code
```

Invalid Tournament ID: Enter an invalid Tournament ID and attempt to join the tournament. The client will return INVALID_TOURNAMENT_ID.

```
INVALID_TOURNAMENT_ID - The tournament ID is invalid, please check and try again
[Error] [ReferenceIntegration] Error INVALID_TOURNAMENT_ID: The tournament ID is invalid, please check and try again
```

Invalid Event ID: Enter an invalid Event ID and attempt to join the event. The client will return INVALID_EVENT_ID.

```
[Error] [ReferenceIntegration] Error INVALID_EVENT_ID: The event ID is invalid, please check and try again
[Error] [ReferenceIntegration] JoinEvent failed: INVALID_EVENT_ID - The event ID is invalid, please check and try again
```

No Wallet: Create and authenticate a user without a wallet, then attempt to join a tournament. The client returns NO_WALLET. To do this, create a user at this URL: <https://club-production-8de5.up.railway.app/signup>. Verify the users' email address after creation and log in to the user portal at this URL: <https://club-production-8de5.up.railway.app/>. Do not create a wallet. Authenticate the user in the Unity client and attempt to join a tournament or event.

```
[Error] [ReferenceIntegration] Error NO_WALLET: Wallet not found
[Error] [ReferenceIntegration] JoinTournament failed: NO_WALLET - Wallet not found
```

Insufficient Funds: Authenticate a user whose wallet cannot cover the entry fee. Set the wallet balance below \$0.50 for a Sample Generator test or below \$1.00 for the provided Open Tournament ID.

Note: The native token in the response is USDC and represents the equivalent USD value. Wallets display standard USD balances, such as \$0.00. If the competition fee exceeds the wallet balance, the join attempt fails with INSUFFICIENT_NATIVE_TOKEN. In this response, transaction fees refer to the entry fee.

[Error] [ReferenceIntegration] Error INSUFFICIENT_NATIVE_TOKEN:
Insufficient native token balance to cover transaction fees
[Error] [ReferenceIntegration] JoinTournament failed:
INSUFFICIENT_NATIVE_TOKEN - Insufficient native token balance to cover
transaction fees

-To remove the funds from the user's wallet, login to the user portal at this URL: <https://club-production-8de5.up.railway.app/>

-Click Wallet in the navigation. Click "Send" option. In the modal, enter an amount that will take the balance down to \$0.10 or less.

-Enter this wallet address in the "Recipient" field: 0x85a9cb0ec1b26ec6ab73ad3a8ede10bc4f4a6745 click "Submit".

Transfer USDC Balance

Amount *

Please ensure that you are sending to a Polygon address.

Your balance is \$33.99 **Max**

Cancel **Submit**

5. Verify Tournament and Event Entry

User View

Sign in to the User Portal using the account that joined the tournament or event via the Unity Client: <https://club-production-8de5.up.railway.app/>

Open Stats. Joined tournaments and events should appear at the top of the table with Started status for events and Opened status for tournaments.

	Name Police Trainer	Gameplay Mode TournamentWinnerTakesAll	Players 1	Entry fee \$0.50	Won \$0.00	Date/Time 2026-09-17 17:11	Status STARTED
	Name Police Trainer Tournament	Gameplay Mode TournamentWinnerTakesAll	Entries 1	Entry fee \$0.50	Won \$0.00	Date/Time 2026-09-17 16:50	Status OPENED

Select a row to view its details.

Game Developer View

Sign in to the Game Developer Portal using the developer credentials associated with your Gamers.bet developer account: <https://developer-production.up.railway.app/>

Open the Tournaments or Events tab. The tournament or event should appear at the top of the table.

TOURNAMENT	GAME / MODE	ENTRY FEE	UNIQUE PARTICIPANTS	ENTRIES	STATUS	START / END	CREATED	ACTIONS
Police Trainer Tournament 2026-08-27 (4) Testing	 Police Trainer Tournament	\$0.01 VARIABLE	4/99	4	OPENED	Aug 27, 2026 Aug 27, 2026	Aug 27, 2026 12:49:17 PM	Cancel

Select the tournament or event by clicking on it in the table, then open Entries subtab. The test user should appear in the list.

 Police Trainer Tournament 2026-08-27 (4) OPENED Police Trainer - Tournament						
Overview Entries Leaderboard Prizes Winners						
USER	EMAIL	ENTRIES	FEES PAID	ATTEMPTS	STATUS	JOINED
 Bagz	derek+test14@dkr.ca	1	\$0.01 	1	ACTIVE	Aug 27, 2026 12:41:48 PM

 happydayz	derek+test17@dkr.ca	1	\$0.01 	1	ACTIVE	Aug 27, 2026 12:43:14 PM
 Stackz	derek+test16@dkr.ca	1	\$0.01 	1	ACTIVE	Aug 27, 2026 12:44:47 PM
Close						

Tournament and event verification follows the same process, using separate tabs in the Developer Portal.

6. Verify Tournament Configuration

The tournament template defines the entry fee, payout format, permitted re-entries, and other parameters.

To verify the provided test tournament, login to the developer portal at this URL: <https://developer-production.up.railway.app/>

Select Games in the navigation. Click View for Police Trainer, then open the Unity Test Tournament template.

Confirm that the entry fee and other parameters shown during testing match the template. The same values appear in the tournament details under Stats in the User Portal.

Note: tournaments and events created with the sample generator do not create templates in the Games section.

7. View Tournament Leaderboard

You can view a tournament leaderboard without authenticating a user or joining the tournament. Enter the Tournament ID and click Show Leaderboard in the Unity client. The selected tournament's leaderboard information should appear.

To retrieve leaderboard data, use Open Tournament ID `cmtdi5yuc00yktl016dbn9vs1` or an ID created with the Sample Generator.

Example Call Return

```
[Log] [WebSocketTransport] Connected successfully!
[Log] [ReferenceIntegration] Leaderboard has 0 entries
[Log] [ReferenceIntegration] 0 entries, showing 0
```

Note: The provided Open Tournament ID and Sample Generator tournaments return 0 leaderboard entries because the call retrieves posted scores. Unity Client users join and pay the entry fee but do not post a score on the leaderboard.

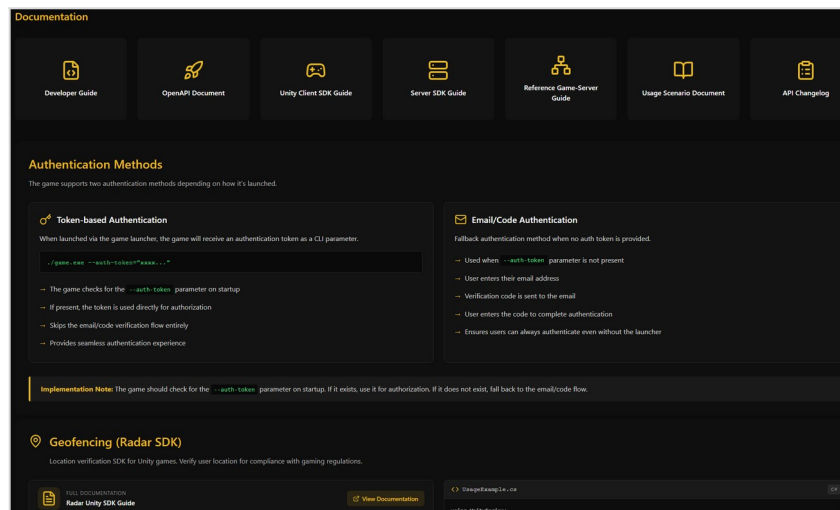

This test confirms that an empty leaderboard correctly returns 0 score entries.

8. Additional Developer Documentation

The public Unity SDK documentation is available in the Unity SDK demo repository: <https://github.com/gamers-bet/gamers-unity-client-sdk-demo-app>

Additional platform and integration documentation is available to registered game developers through the Gamers.bet Game Developer Portal under the **Documentation** tab.

Available resources include the Developer Guide, OpenAPI Document, Server SDK Guide, Reference Game-Server Guide, Usage Scenario Document, API Changelog, and implementation guidance for authentication, geofencing, and other topics.

9. Synchronous Event Testing Note

The Unity SDK supports asynchronous tournaments and synchronous events. Synchronous events are live sessions in which players join at the same time, so production events cannot remain open indefinitely. For general QA testing, the event remains open.

An open Tournament ID is provided for repeatable testing of authentication, paid-game entry, and leaderboard functionality.
