

GAMERS.BET UNITY SDK

END USER LICENSE AGREEMENT

Provider	Gamers.bet, Inc., a Delaware corporation
Software	Gamers.bet Unity SDK
Package	com.gamers.client
Version	1.0
Effective date	August 17, 2026

1. Agreement and Acceptance

This End User License Agreement (the "EULA") is a legally binding agreement between the individual or legal entity that downloads, installs, accesses, copies, or uses the SDK ("Licensee" or "you") and Gamers.bet, Inc., a Delaware corporation ("Gamers.bet," "Provider," "we," or "us"). If you accept this EULA on behalf of an entity, you represent that you have authority to bind that entity.

By downloading, installing, copying, accessing, or using the SDK, you accept this EULA. If you do not agree, do not download, install, access, copy, or use the SDK.

This EULA licenses the SDK to developers, studios, publishers, and other business users. It is not the Gamers.bet terms of service, privacy policy, player-facing end user license agreement, competition rules, or other terms governing players or participants (collectively, the "Player Terms").

The SDK is licensed, not sold. Gamers.bet is the licensor and is solely responsible for the SDK and this EULA. Unity Technologies and its affiliates (collectively, "Unity") operate the Unity Asset Store but are not parties to this EULA, do not license the SDK under this EULA, and have no obligation to provide support, maintenance, warranties, indemnification, or other remedies concerning the SDK. Unity's terms continue to govern your use of the Unity Asset Store and Unity software.

2. Definitions

"Authorized Product" means a game or other interactive application owned or controlled by Licensee that incorporates the Runtime Components, is registered with Gamers.bet where required, and is used in accordance with the Documentation and the agreements applicable to the relevant activity.

"Commercial Agreement" means the Gamers.bet Platform Access and Payment Agreement, or another written commercial agreement signed by Gamers.bet and Licensee, that authorizes production access to the Services for one or more identified Authorized Products.

"Developer Account" means the Gamers.bet account or organization through which Licensee obtains credentials, registers an Authorized Product, accesses a sandbox, or obtains access to the Services.

"Developer Portal Agreement" means the Gamers.bet Developer Portal Access Agreement accepted by Licensee for access to the developer portal, APIs, SDKs, Documentation, TestNet, test environments, and related evaluation and integration tools.

"Documentation" means the integration guides, API references, security requirements, compatibility information, sample materials, and written instructions supplied by Gamers.bet for the SDK or Services.

"Gamers.bet Distribution Services" means the optional Gamers.bet game store, game launcher, file hosting, public distribution, and related Mac, PC, Android, or other supported distribution functionality. A Platform Listing does not, by itself, constitute use of Gamers.bet Distribution Services.

"Runtime Components" means only those portions of the SDK that the Documentation identifies as permitted for compilation into and distribution as part of an Authorized Product.

"SDK" means the Gamers.bet Unity software development kit distributed under the package name com.gamers.client, including its source code, compiled code, interfaces, models, samples, documentation included in the package, updates, and related materials supplied by Gamers.bet. The SDK does not include third-party materials governed by separate licenses.

"Services" means Gamers.bet-hosted or Gamers.bet-authorized APIs, Developer Portal, TestNet, MainNet, identity and eligibility services, competition administration, payments, settlement, reporting, support, Gamers.bet Distribution Services, sandbox environments, and related backend functionality made available separately from the SDK.

"Service Agreement" means the Developer Portal Agreement, a Commercial Agreement, any applicable order form, and any other terms accepted by Licensee for access to or use of the Services.

3. License Grant

Subject to Licensee's continuing compliance with this EULA, Gamers.bet grants Licensee a limited, non-exclusive, worldwide, non-transferable (except as expressly permitted in Section 18), non-sublicensable license during the term of this EULA to:

- install and use the SDK internally to evaluate, develop, test, and maintain Authorized Products;
- make reasonable internal copies for development, testing, continuous integration, backup, and archival purposes;
- modify SDK source code only to the extent reasonably necessary to integrate the SDK into an Authorized Product and only as permitted by the Documentation or Gamers.bet in writing; and
- compile, reproduce, and distribute the Runtime Components solely as an embedded, inseparable object-code component of an Authorized Product that contains substantial original functionality independent of the SDK.

Licensee may permit its employees, controlled affiliates, and contractors to exercise these rights solely on Licensee's behalf, provided they are bound by written obligations at least as protective as this EULA. Licensee remains responsible for their conduct. No license is granted to use the SDK for the benefit of an unrelated third party or to operate a development bureau, hosting service, or competing service.

The SDK license does not itself grant access to the Services, production credentials, payment functionality, regulated markets, MainNet, or Gamers.bet Distribution Services. Evaluation and TestNet rights arise under the Developer Portal Agreement. Production, MainNet, real-money competition, commercial, and Gamers.bet Distribution Services rights arise only under a Commercial Agreement and any required Gamers.bet approvals.

4. Distribution of Authorized Products

Licensee may distribute Runtime Components only when compiled into an Authorized Product and only if the Runtime Components cannot reasonably be extracted and used as a standalone SDK. Licensee may distribute or sell an Authorized Product through third-party channels or, if made available under a Commercial Agreement, through the optional Gamers.bet game store or game launcher. Use of the SDK does not require Licensee to distribute or sell its Authorized Product through Gamers.bet.

This EULA permits embedded distribution of the Runtime Components but does not authorize activation of production Services or public real-money functionality. Licensee may activate MainNet, offer real-money competition, or monetize real-money competition only as permitted by a Commercial Agreement, Gamers.bet approvals, platform rules, the Player Terms, and applicable law.

Licensee must not distribute SDK source code, editor-only code, sample source, credentials, documentation, or development tools with an Authorized Product unless the Documentation expressly identifies the material as distributable. Licensee must include all copyright, attribution, open-source, and proprietary notices required by the SDK, the Third-Party Notices file, and applicable third-party licenses.

Licensee's end-user terms must protect the Runtime Components from standalone extraction, redistribution, reverse engineering, and misuse to at least the same extent Licensee protects its own proprietary software, subject to non-waivable rights under applicable law. End users receive no direct right to access the SDK source code or the Services under this EULA.

5. Complementary Agreements and Services

The SDK is an integration layer that interfaces with the Services. The SDK does not itself provide gameplay, hold funds, determine competition outcomes, perform identity or location verification, settle transactions, or grant legal authority to offer real-money gameplay.

SDK Layer. This EULA governs Licensee's installation, internal use, modification, and authorized embedded distribution of the SDK and Runtime Components. It does not govern player participation or the commercial operation of the Services.

Portal and TestNet Layer. The Developer Portal Agreement governs Developer Accounts, portal access, evaluation, TestNet and sandbox use, integration testing, test materials, uploaded Developer Content, and non-public portal information. Acceptance of the Developer Portal Agreement alone does not authorize MainNet or commercial real-money operation.

Production and Commercial Layer. A Commercial Agreement governs the Authorized Products covered by that agreement, MainNet and production access, Real Money Competitive Events, commercial terms, revenue sharing, settlement, operational and regulatory allocation, service levels, and any Gamers.bet Distribution Services used by Licensee. Execution of a Commercial Agreement authorizes the production activities expressly stated in that agreement notwithstanding evaluation-only restrictions in the Developer Portal Agreement for the same Authorized Products and activities.

Complementary Operation. The parties intend this EULA and the applicable Service Agreements to be complementary and interpreted according to their respective subject matter. Different terms are not a conflict merely because one agreement governs the SDK, another governs evaluation access, and another governs production and commercial services. Licensee may be required to satisfy technical certification, approval, credential, fee, revenue-share, data-protection, and compliance requirements under the applicable Service Agreements.

6. Integration, Security, and Compliance Requirements

Licensee must integrate and use the SDK and Services in accordance with the Documentation, including the documented server-authoritative architecture and security model. Without limiting that obligation, Licensee must:

- keep API keys, server credentials, signing secrets, administrative credentials, and other confidential credentials out of client builds and public repositories;
- use supported server-side components and transports for privileged calls, result verification, and other functions that the Documentation designates as server-side;
- implement reasonable security controls, promptly install security-related updates, and notify Gamers.bet of suspected credential compromise, fraud, security vulnerabilities, or unauthorized access;
- submit complete and accurate gameplay, competition, participant, and result information and refrain from fabricating, altering, or suppressing information provided to the Services;
- comply with applicable laws, platform policies, consumer-protection requirements, privacy obligations, sanctions, age restrictions, and other legal requirements applicable to Licensee, the Authorized Product, or Licensee's use of the SDK, subject to any allocation of responsibilities under an applicable Commercial Agreement;
- obtain all notices, permissions, consents, licenses, and approvals required for the Authorized Product, its content and intellectual property, and its collection and transmission of data.

Licensee is responsible for its game design, gameplay integrity, determination and documentation of skill-based outcomes, rules, scoring, result generation, dispute cooperation, marketing claims, store submissions, and end-user experience, except to the extent a Commercial Agreement expressly assigns a responsibility to Gamers.bet. This EULA does not expand, reduce, or reallocate the operational,

regulatory, payment, settlement, customer-support, or data responsibilities stated in a Commercial Agreement.

Neither availability of the SDK nor Verified Solution status is legal advice, an endorsement of any game or business model, or confirmation that Licensee may offer real-money gameplay in any jurisdiction.

7. Prohibited Uses

Except to the extent a restriction is prohibited by applicable law, Licensee must not, and must not allow any third party to:

- sell, sublicense, rent, lease, lend, publish, host, open-source, distribute, or otherwise make the SDK available as a standalone product or service;
- use the SDK or Services to create or operate a competing SDK, API, settlement network, marketplace, or real-money gameplay infrastructure service;
- reverse engineer, decompile, disassemble, derive non-provided source code from, or circumvent technical restrictions of any compiled or hosted portion of the SDK or Services, except where mandatory law permits the activity notwithstanding this restriction;
- remove, obscure, or alter proprietary notices, attribution, license notices, security controls, usage controls, or Unity Verified Solutions attribution included in the Asset Store version of the SDK, except where required by law;
- use the SDK or Services for casino games, games of chance, or competitions whose outcome is determined predominantly by randomness or any other activity prohibited by Gamers.bet;
- bypass, disable, falsify, or interfere with identity, age, KYC, AML, geolocation, jurisdictional eligibility, payment, settlement, withdrawal, responsible-participation, fraud-prevention, or security controls;
- use production credentials, production endpoints, or real-value transactions for testing, or use sandbox credentials or balances as if they had monetary value;
- introduce malicious code, probe or overload systems, scrape or harvest data, access another customer's account or data, or use the SDK or Services in a way that could damage or disrupt Gamers.bet, Unity, a service provider, or another user; or
- use the SDK or Services in violation of law, the Service Agreement, the Documentation, third-party rights, or an instruction issued by Gamers.bet to address security, fraud, compliance, or legal risk.

8. Data, Attribution, and Privacy

The Unity Asset Store version of the SDK includes Unity Verified Solutions attribution functionality that operates in the Unity Editor. When a Licensee connects or configures its Developer Account or performs

another documented activation action, the SDK may send Unity a limited attribution event consisting of an action name, the provider name, and an opaque customer, organization, or developer identifier that Gamers.bet can associate with Licensee. This attribution is used to identify customers originating from Unity's ecosystem.

The Verified Solutions attribution event is not intended to include player identity, gameplay, financial, wallet, payment, KYC, precise-location, or competition-result data. Licensee must not substitute those data types, an API secret, a password, or any other sensitive credential for the documented attribution identifier.

Other data processed through the SDK or Services is governed by the applicable Service Agreement, the Gamers.bet privacy policy, the Player Terms, and Licensee's own privacy notices and legal obligations. Any allocation of controller, processor, disclosure, retention, security, or breach-response responsibilities in a Commercial Agreement controls for the covered Services. Gamers.bet and Unity may each process attribution data under their respective privacy policies.

9. Third-Party Materials

The SDK may depend on or interoperate with third-party software, including com.unity.nuget.newtonsoft-json 3.2.1 (Json.NET). Third-party materials are governed by their applicable licenses and notices, including the Third-Party Notices file supplied with the SDK. This EULA does not restrict rights granted under an applicable open-source license. If this EULA conflicts with a third-party license solely as to the applicable third-party material, that third-party license controls for that material.

Unity software, packages, services, trademarks, and other Unity materials are licensed by Unity under Unity's own terms. No Unity materials are licensed by Gamers.bet under this EULA.

10. Ownership, Reservation of Rights, and Feedback

As between the parties, Gamers.bet and its licensors retain all right, title, and interest in and to the SDK, Documentation, Services, APIs, protocols, trademarks, updates, Gamers.bet-created modifications and derivative works, and all related intellectual property rights. Licensee retains ownership of its Authorized Products and any modifications Licensee creates, excluding the underlying SDK, Runtime Components, Services, and Gamers.bet materials. Licensee-created modifications remain subject to this EULA and may be used or distributed only as expressly permitted here.

No rights are granted by implication, estoppel, or otherwise. All rights not expressly granted are reserved. This EULA does not grant Licensee any right to use Gamers.bet names, logos, domains, or trademarks except for accurate, nominative references permitted by the Documentation or prior written approval.

If Licensee voluntarily provides suggestions, ideas, corrections, or other feedback about the SDK or Services, Licensee grants Gamers.bet a worldwide, perpetual, irrevocable, sublicensable, transferable, royalty-free license to use and exploit that feedback without restriction or obligation, provided Gamers.bet does not identify Licensee as the source without permission.

11. Updates, Compatibility, Support, and Availability

Gamers.bet may provide updates, upgrades, patches, compatibility releases, or security fixes. Updates may add, change, or remove functionality and are governed by this EULA unless accompanied by different terms. Licensee must use supported SDK and Unity versions identified in the Documentation and must apply security or compliance updates within the timeframe specified by Gamers.bet.

Support, service levels, maintenance commitments, backward compatibility, and access to specific Services are provided only as stated in the Documentation or an applicable Service Agreement. Unless expressly agreed in writing, Gamers.bet has no obligation to provide support, maintain any feature or endpoint, or make the SDK or Services available without interruption.

12. Confidentiality

Non-public credentials, technical information, security materials, test data, roadmaps, and other information disclosed by Gamers.bet that is marked confidential or reasonably should be understood as confidential constitute Gamers.bet Confidential Information. Licensee will use Confidential Information only to exercise rights under this EULA or a Service Agreement, will protect it using at least reasonable care, and will disclose it only to personnel and contractors who need to know it and are bound by confidentiality obligations.

Confidential Information does not include information that Licensee can document: (a) is publicly available without breach; (b) was lawfully known without restriction before disclosure; (c) is received lawfully from a third party without confidentiality duty; or (d) is independently developed without use of Confidential Information. SDK materials, Documentation, samples, and notices that Gamers.bet intentionally makes publicly available through the Unity Asset Store or another authorized channel are not confidential solely by reason of being Gamers.bet materials; non-public credentials, security information, portal materials, and unpublished functionality remain protected. A legally compelled disclosure is permitted if Licensee gives prompt notice where lawful and provides reasonable assistance in seeking protection.

13. Suspension and Termination

This EULA begins when Licensee first downloads, installs, accesses, copies, or uses the SDK and continues until terminated. Licensee may terminate by ceasing all use and deleting all copies under its control.

Gamers.bet may suspend or terminate this EULA or any SDK license immediately if Licensee materially breaches this EULA; violates law or a Service Agreement; creates a security, fraud, regulatory, reputational, or operational risk; infringes intellectual property; misuses credentials or data; or if suspension or termination is required by Unity, a platform, a service provider, a governmental authority, or applicable law. For a breach that is reasonably curable and does not present immediate risk, Gamers.bet may provide a reasonable opportunity to cure.

Upon termination of this EULA, Licensee must stop using and distributing the SDK, remove SDK source and development copies from systems under its control, and stop releasing new versions of Authorized

Products containing Runtime Components. Licensee is not required to recall object-code Runtime Components already embedded in previously distributed Authorized Products solely because of termination, unless Gamers.bet reasonably requires removal to address infringement, security, fraud, legal, or regulatory risk.

The SDK license and Service Agreements have separate terms and may be suspended or terminated independently unless an applicable agreement states otherwise. Suspension of portal access does not by itself terminate this EULA, although it may prevent use of the Services. Expiration or termination of a Commercial Agreement ends the production, MainNet, real-money competition, and Gamers.bet Distribution Services rights granted by that agreement, but does not by itself terminate Licensee's right under this EULA to retain and use the SDK for authorized internal evaluation and development. Wind-down of active events, player funds, distributions, hosted game files, listings, and Service data is governed by the applicable Commercial Agreement and Player Terms.

Sections 5 through 10 and 12 through 18, together with provisions that by their nature should survive, survive termination.

14. Disclaimer of Warranties

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE SDK, DOCUMENTATION, SAMPLES, UPDATES, AND RELATED MATERIALS ARE PROVIDED "AS IS" AND "AS AVAILABLE," WITH ALL FAULTS AND WITHOUT WARRANTIES, REPRESENTATIONS, CONDITIONS, OR GUARANTEES OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY, OR OTHERWISE. GAMERS.BET AND ITS LICENSORS DISCLAIM ALL IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, QUIET ENJOYMENT, ACCURACY, AND ARISING FROM COURSE OF DEALING OR USAGE OF TRADE.

GAMERS.BET DOES NOT WARRANT THAT THE SDK WILL BE UNINTERRUPTED, SECURE, ERROR-FREE, COMPATIBLE WITH EVERY UNITY VERSION OR PLATFORM, OR SUITABLE FOR LICENSEE'S PARTICULAR GAME, BUSINESS MODEL, OR JURISDICTION; THAT DEFECTS WILL BE CORRECTED; OR THAT USE WILL RESULT IN APPROVAL BY UNITY, AN APP STORE, A DISTRIBUTION PLATFORM, A PAYMENT PROVIDER, A REGULATOR, OR ANY OTHER THIRD PARTY. LICENSEE IS RESPONSIBLE FOR TESTING THE SDK AND AUTHORIZED PRODUCT BEFORE RELEASE.

Nothing in this EULA excludes warranties or rights that cannot lawfully be excluded. The Services may be subject to different express warranties, if any, only under an applicable signed Service Agreement.

15. Limitation of Liability

TO THE MAXIMUM EXTENT PERMITTED BY LAW, GAMERS.BET, ITS AFFILIATES, LICENSORS, SERVICE PROVIDERS, AND THEIR OFFICERS, DIRECTORS, EMPLOYEES, AND AGENTS WILL NOT BE LIABLE FOR ANY INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, PUNITIVE, OR CONSEQUENTIAL DAMAGES; LOSS OF PROFITS, REVENUE, BUSINESS, GOODWILL, DATA, OR DIGITAL ASSETS; BUSINESS INTERRUPTION; COST OF SUBSTITUTE PRODUCTS OR SERVICES; OR CLAIMS ARISING FROM END USERS, PLATFORMS, REGULATORS, PAYMENT PROVIDERS, OR OTHER THIRD PARTIES, REGARDLESS OF THEORY OF LIABILITY AND EVEN IF ADVISED OF THE POSSIBILITY.

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THE AGGREGATE LIABILITY OF GAMERS.BET AND THE OTHER GAMERS.BET PARTIES ARISING OUT OF OR RELATING TO THE SDK, DOCUMENTATION, OR THIS EULA WILL NOT EXCEED THE GREATER OF (A) ONE HUNDRED U.S. DOLLARS (US \$100) OR (B) THE AMOUNT LICENSEE PAID DIRECTLY TO GAMERS.BET FOR THE SDK LICENSE DURING THE TWELVE MONTHS BEFORE THE EVENT GIVING RISE TO LIABILITY. FEES PAID FOR SERVICES ARE EXCLUDED AND ARE GOVERNED BY THE APPLICABLE SERVICE AGREEMENT.

The exclusions and cap do not apply to liability that cannot be excluded or limited under applicable law. The parties agree that these limitations are an essential basis of the bargain and apply even if a remedy fails of its essential purpose. Liability arising from the Services, MainNet, real-money competition, settlement, payments, Gamers.bet Distribution Services, or other commercial operations is governed by the applicable Commercial Agreement and is not subject to this Section merely because the SDK was used to access those Services. No party may obtain duplicative recovery under this EULA and a Service Agreement for the same loss. Unity has no liability under this EULA.

16. Indemnification

To the maximum extent permitted by law, Licensee will defend, indemnify, and hold harmless Gamers.bet, its affiliates, licensors, service providers, and their officers, directors, employees, and agents from third-party claims, proceedings, damages, penalties, fines, judgments, settlements, costs, and reasonable attorneys' fees arising out of or relating to: (a) Licensee's distribution of the SDK or Runtime Components contrary to this EULA; (b) Licensee's integration or use of the SDK in breach of this EULA or the Documentation; (c) allegations that Licensee-created modifications to the SDK infringe or misappropriate third-party rights; or (d) Licensee's fraud, willful misconduct, or security failure involving the SDK.

Gamers.bet will provide reasonable notice of a covered claim and may control the defense and settlement. Licensee may not settle a claim in a manner that admits fault by, imposes obligations on, or fails to fully release a protected Gamers.bet party without Gamers.bet's prior written consent. This section does not require indemnification to the extent a claim is caused by Gamers.bet's gross negligence, willful misconduct, or infringement by the unmodified SDK when used as authorized. Indemnification relating to an Authorized Product, gameplay, content, the Services, player data, real-money competition, payments, settlement, Gamers.bet Distribution Services, or commercial operations is governed by the applicable Commercial Agreement and not this Section, except to the extent a claim independently arises from conduct expressly covered above.

17. Export, Sanctions, and Government Use

Licensee must comply with applicable export-control, import, trade-sanctions, and anti-boycott laws. Licensee represents that it is not located in, organized under the laws of, ordinarily resident in, or controlled by a prohibited territory and is not a sanctioned or restricted party. Licensee will not export, re-export, transfer, or use the SDK or Services for prohibited end uses or parties.

The SDK and Documentation are commercial computer software and commercial computer software documentation. Any government use is subject to the rights and restrictions customarily applicable to commercial software and this EULA, to the extent permitted by law.

18. General Terms

Governing Law and Venue. This EULA is governed by the laws of the State of Delaware, without regard to conflict-of-law rules. The United Nations Convention on Contracts for the International Sale of Goods does not apply. Subject to any non-waivable law, the state and federal courts located in New Castle County, Delaware have exclusive jurisdiction, and each party consents to personal jurisdiction and venue there.

Assignment. Licensee may not assign or transfer this EULA or any rights under it, by operation of law or otherwise, without Gamers.bet's prior written consent, except in connection with a merger, reorganization, or sale of substantially all assets related to the Authorized Product if the successor is not a competitor of Gamers.bet, assumes this EULA in writing, and is eligible to use the Services. Gamers.bet may assign this EULA to an affiliate or in connection with a merger, financing, reorganization, or sale of assets or business.

Changes. Gamers.bet may update this EULA for future SDK versions or when reasonably necessary to address law, security, compliance, platform requirements, or material product changes. Updated terms will be posted with a revised effective date. To the extent required by law, material changes will apply after notice. Continuing to use a new SDK version after updated terms become effective constitutes acceptance of those updated terms.

Notices. Legal notices to Gamers.bet must be sent using the legal contact information then published on the Gamers.bet website and are effective upon confirmed receipt. Gamers.bet may send notices to the email address associated with Licensee's Developer Account, through the developer portal, or with an SDK or Documentation update.

Entire Agreement; Complementary Documents; Order of Precedence. This EULA is the entire agreement concerning the SDK license and supersedes prior statements on that subject. It does not supersede Unity terms governing the Unity Asset Store, the Developer Portal Agreement governing portal and evaluation access, a Commercial Agreement governing production and commercial Services, or the Player Terms. The agreements must first be interpreted as complementary according to Section 5. If an irreconcilable conflict remains: (1) a Commercial Agreement controls for the Authorized Products and production, MainNet, commercial, regulatory, settlement, support, data, and Gamers.bet Distribution Services matters it covers; (2) this EULA controls installation, modification, and distribution of the SDK and Runtime Components, unless the Commercial Agreement expressly modifies an SDK right; (3) the Developer Portal Agreement controls Developer Portal, TestNet, evaluation, uploaded Developer Content, and account-access matters not superseded by authorized commercial activity; (4) the Documentation controls technical implementation but does not expand legal or commercial rights.

Severability; Waiver. If a provision is held unenforceable, it will be enforced to the maximum permissible extent and the remainder will remain effective. A waiver must be in writing and signed by the waiving party. Failure to enforce a provision is not a waiver. Remedies are cumulative unless expressly stated otherwise.

Relationship; Third Parties. The parties are independent contractors. This EULA creates no partnership, joint venture, agency, franchise, fiduciary, employment, or exclusivity relationship. Except for Unity's right to rely on the disclaimers of responsibility and liability stated in this EULA and the protected Gamers.bet parties identified in Sections 15 and 16, there are no third-party beneficiaries.

Force Majeure. Neither party is liable for delay or failure caused by events beyond its reasonable control, except payment, confidentiality, data-security, and compliance obligations that can reasonably continue despite the event.

Headings and Interpretation. Headings are for convenience only. "Including" means "including without limitation." Electronic acceptance and electronic records have the same effect as originals. This EULA may be provided in translations, but the English version controls to the extent permitted by law.

19. Contact

Questions about this EULA may be directed through the current legal or support contact published at <https://gamers.bet>. Legal notices must follow Section 18.
